

Subject: Rosacea Testimonial

I have Rosacea and had tried everything...metro gel, cortisone cream...finally the dermatologist put me on Tetracycline. I was on it for years. It worked but I did not like being on an antibiotic. When I went off it two years ago (so that I could go out in the sun) of course I started breaking out again.

I went on OPC (two caps in the morning) and within 2 days, my skin was clear. I also switched over from Mary Kay and use only Skintelligence and my skin is so clear, I cannot believe it!!! I only wish I had found out about this 13 years ago when I first had signs of it.

Hope this helps,

Joan
