

Subject: Vision Formula Testimony

Hi Gang:

Just wanted to pass this along to you. My Grandmother has been taking OPC-3, Antioxidant, and our Vision Formula for quite some time now. She was at her eye Doctor yesterday for a pressure check on her glaucoma. Her >pressure is down to 19 and 21 for both eyes. They were up as high as 24 >and 27. That is too high for a glaucoma patient. To say the least her Doctor was quite pleased with this and asked about the products and told her to continue with her regimen. Our products have prevented my Grandmother from having to add any other prescription medication to treat her condition. My Grandmother is pleased, her Doctor is pleased. It just goes to show that this stuff really works and the benefits are endless.

Have a good evening,

Anne
